

PIONEER METAL AT PORTLAND, OR

Pioneer Metal Finishing's Portland Division offers creative capabilities unique in the metal finishing industry.

Pioneer Portland is capable of handling the most difficult finishing requirements. Our finishes range from highly decorative Metal Fx™ to conventional anodize with bright dip to tight tolerance hardcoat anodize

In 2006, Pioneer Metal Finishing Portland acquired the former Plus One Anodize. In January 2007, we moved to a new 35,000 square foot facility that allows the ability to handle orders both large and small in a timely manner. Through the transition, we've retained the same experienced team under the direction of Richard Bretherton, Operations Manager.
