

## THE PROCESS

Pioneer Metal Finishing is pleased to introduce its proprietary Medi-Black™ Anodize for medical applications requiring superior sterilization performance.

The Process entails traditional anodizing combined with a proprietary coloring method which prevents fading during intense sterilization. In addition, this process maintains the integrity of the anodized coating and is approved by the medical industry.

## THE OVERVIEW

### MEDI-BLACK ANODIZE™

Medi-Black Anodize was developed as a solution to the medical industry's challenges to increase sterilization performance and exceeds industry standard requirements.

### RECEPTIVE METALS

Aluminum Alloys

6000, 3000 & 5000 series only

Not suitable for 7000, 2000 or castings

### THICKNESS

.0004 - .001"

### MAX PART SIZE

36" X 36" x 30"

### SPECIFICATIONS

MIL-A-8625 Type II (Class 2)

### PERFORMANCE BENEFITS

Increased Fade Resistance
