

FrostKote™

for wrought aluminum alloys

ADVANTAGES OF FrostKote™

- ◆ **UNIFORM 'FROSTED' APPEARANCE**
- ◆ **Blends and minimizes grain boundary line defects and die lines from extrusion**
- ◆ **Eliminates the need for media blasting**
- ◆ **Improves appearance and can be anodized clear or dyed**
- ◆ **Also available as Hard FrostKote™ for demanding wear applications**
- ◆ **Low reflectivity and various levels of 'frosted' appearance attainable**
- ◆ **Part dimensions up to 156" length x 28" width x 48" depth**

*The color of clear and dyed FrostKote™ is dependent on alloy, surface finish and coating thickness. The colors produced are muted with low reflectivity. Due to alloy response to coloring, samples should be submitted by the customer to develop an accepted color range.
